Modified Course Syllabus and Timing for OCC Staff 2007

5105B: Deploying Microsoft® Windows Vista™ Business Desktops

This modified course is specifically tailored to the interests of the Oakland Community College IT staff. It is designed to cover only selected topics from the original three-day course within a one-day workshop. For additional information about the content of the original course, please see the original 5105B course syllabus.

Though full modules are listed below, the intent will be cover only material that is relevant to the IT staff of OCC. Therefore, some topics may be covered in overview only. In addition, some class discussions regarding considerations for varying environments may be covered only briefly due to the audience.

Course Timing and Curriculum Modifications

The following timing is based on original course timing adjusted for modifications in the course curriculum and may not be exact. Class knowledge level and experience may allow for additional material to be covered within the time allotted. Exact timing for breaks and lunch will depend on module progress and may be adjusted during the class if needed.
